

実践モデルプログラムを活用した授業づくりシート

*日々の授業づくりに活用ください。

育成する資質・能力

児童生徒が働かせる見方・考え方

児童生徒の反応・考え・発言など

The central part of the sheet consists of four quadrants, each representing a different perspective or stage of the lesson. Each quadrant is a rounded rectangle with a colored border and a central pink silhouette of a student's head and shoulders. Surrounding each silhouette are four empty speech bubbles, two on the left and two on the right, intended for recording student reactions, thoughts, or statements. The quadrants are arranged in a 2x2 grid. The top-left quadrant has a blue border, the top-right has a yellow border, the bottom-left has a cyan border, and the bottom-right has a green border. In the center, where the four quadrants meet, there is a circular arrow graphic with four segments in blue, yellow, green, and cyan, pointing clockwise, suggesting a cyclical or interconnected relationship between the different observation points.
